DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/2/2004 and 2/11/2004 has been entered.

The 35 USC 103(a) rejection over over Kirk (US Pat. 6,025,186) in view of EP 1 043 273 and DE 3820726 is withdrawn as EP 1 043 273 only discloses solutions of mannitol and hydrogen peroxide and not crystalline forms and none of the cited prior art disclose maintaining greater than about 20% *Proteus mirabilis* viability.

Double Patenting

Examiner withdraws the election of species requirement, the restriction requirement is maintained. Examiner reminds Applicant of the current rejoinder practice.

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04. **Process claims that depend from or otherwise include all the limitations of the patentable product** will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of *In re Ochiai*, *In re Brouwer* and 35 U.S.C. § 103(b)," 1184 O.G.

Art Unit: 1616

86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

Claim Objections

The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Claims 43-46 were previously cancelled and claims 22-42 are withdrawn but not cancelled. As such, the new claims cannot start at claim 43-50 but must be renumbered 47-54. Examiner notes that Applicant is required to set forth a list of all claims including withdrawn claims.

Claim Rejections - 35 USC § 112

Claims 43-50 (Claims 47-54 after correction by Applicant) are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicant cites to Specification, Examples 1-5 and original claims 5 and 18 for support of said claims. However, there does not appear to be support for the limitation "kills no more than about 20% of the *Proteus mirabilis*",

Art Unit: 1616

as such, it does not appear that it would be readily apparent to one of ordinary skill in the art that

Applicant intended said limitation at the time the Application was filed.
